Heading 2 Manrope Bold / 24px	**Structuring global academic research.**
Heading 3 Manrope SemiBold / 20px	Systematic evidence gathering.
Body Large Inter Regular / 16px	The core visual foundations for the mondaiy web application ensure high cognitive clarity.
Body Default Inter Regular / 14px	Academic minimalism utilizes a light canvas approach to ensure maximum readability during long-form research sessions.
UI Label Inter Medium / 14px	DOWNLOAD RESEARCH ASSETS
Caption Inter Regular / 12px	Source: 2024 Academic Workspace Design Standards

SPACING & LAYOUT

Our layout is governed by an 8pt grid system. This ensures vertical rhythm and consistent density across all workspace modules.

LAYOUT PRINCIPLES

- Generous whitespace to prevent cognitive overload.
- Clear visual hierarchy through typographic weight.
- Consistent card alignment using 12px corners.

INPUTS & FORMS

Search Queries

Enter keywords...

Sample Card Layout
12px radius, 1px border.

STATUS INDICATORS

CERTAIN — Evidence is verified.

POSSIBLE — Requires peer review.

ASK MENTOR — Urgent clarification needed.

DESIGN PRINCIPLES

Evidence First
Never show a conclusion without a direct link to the supporting scholarly source material.

User Control
AI is a research partner, not an oracle. The user always has the final word on document structure.

Clear Uncertainty
Explicitly label varying degrees of confidence. Ambiguity is presented as an opportunity for research.

Calm Info Density
Avoid clutter. Prioritize the current line of thinking while keeping side-research reachable.

Accessible by Default
WCAG 2.1 compliance for color contrast and font scaling ensures workspace equity.

Consistent Navigation
The fixed Navigator provides a persistent mental map of the research workspace.

Traceable AI Synthesis for Educational Programs

Turn program updates into clear next actions.

Mondaiy brings together updates from your connected program sources, explains what matters to you, and helps you decide what to do next.

Get Started → Explore the Product

Program information is often fragmented.

Important deadlines buried in chat, updates spread across platforms, conflicting notes, and unread announcements cause missed milestones.

Fragmented Information

Scattered Discord channels, Canvas portals, and mentor emails make tracking deliverables stressful.

- Important deadline changes hidden in 40+ unread Discord messages
- Conflicting office hour times between email and Canvas LMS
- Silent automated tools modifying calendars without review

Clear & Traceable Next Actions

Mondaiy unifies all feeds into a single daily briefing with verified sources and confidence ratings.

- Single synthesized Daily Briefing highlighting key changes
- Explicit confidence badges (Certain, Possible, Ask Mentor)
- 100% User-controlled confirmation before any task or calendar update

How It Works

From source connection to verified decision-making in 3 clear steps.

01

1. Connect your program sources

Connect supported sources (Discord, Canvas, Email) and review exactly what Mondaiy can access.

02

2. Review your Daily Briefing

See what changed, why it matters, and what deliverables may need your attention today.

03

3. Review before acting

Mondaiy prepares suggestions, but you review and confirm tasks, calendar events, and decisions.

Core Features Built for Scholars

Daily Briefing

Understand what is new, relevant, and actionable across all program channels at a glance.

Source Transparency

Every important item links directly back to its original source channel, timestamp, and raw quote.

Grounded Confidence

Know whether information is confirmed (Certain), draft (Possible), or requires mentor verification (Ask Mentor).

AI Mondaiy Assistant

Ask questions about your briefing and inspect supporting evidence instantly.

User-Controlled Actions

No task, reminder, or calendar event is created without your explicit approval.

Conflict Detection

Detect when connected sources disagree instead of making hidden assumptions.

Privacy & Verification Core

Your information remains visible and reviewable.

Built on privacy-first read-only integrations with zero silent automated modifications.

Read-Only Integrations
Zero write access to Discord, Email, or Canvas LMS feeds.

Source Timestamps
Every claim includes original post link and verbatim quote.

No Silent Actions
Explicit review required for task or calendar commitments.

Transparent Coverage
Clear indication of active vs disconnected source feeds.

ONBOARDING & CONTEXT SETUP

Configure Mondaiy

Step 1 of 9: Welcome

Exit Setup

Welcome to Mondaiy

Navigator synthesizes fragmented program feeds (Discord, Canvas LMS, Email, Calendar) into clear, traceable daily action plans. It operates under strict user-control boundaries:

1. Transparent Source Evidence
Every synthesis includes original timestamps, platform location, and raw quotes.

2. No Automated Actions Without Consent
Navigator never creates calendar events, saves tasks, or sends emails without explicit user review.

ONBOARDING & CONTEXT SETUP

Configure Mondaiy

Step 2 of 9: Privacy & Consent

Exit Setup

Privacy Boundary & Source Permissions

Navigator uses read-only API access to parse announcements, deliverables, and schedule changes. Your data is stored locally in your browser workspace and never sold or shared.

- [x] **I consent to read-only monitoring of my connected program sources.**
  You can modify or disconnect sources anytime from the Source Library.

ONBOARDING & CONTEXT SETUP

Configure Mondaiy

Step 3 of 9: Program Context

Exit Setup

Scholar Program Context

Tell Navigator about your cohort track so it can prioritize relevant announcements.

BRIEFING SUMMARY

Proposal Submission deadline for Milestone 1 is due in 24 hours. Required milestone for scholar program completion.

What Changed

Countdown: 24 hours remaining (Due July 29, 11:59 PM UTC).

Why It Matters

Required milestone for scholar program status and mentor evaluation.

Recommended Next Step

Review requirements and finalize submission in Canvas LMS.
